PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student with strong foundations in Python, AI application development. Experienced in developing AI-powered applications using, LangChain, Retrieval-Augmented Generation (RAG), CrewAI, Prompt Engineering.

Passionate about building intelligent software solutions and continuously expanding my expertise in emerging AI technologies.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Front-End Development: HTML5, CSS3, React.js

AI Techniques: Prompt Engineering, Retrieval-Augmented Generation (RAG), LangChain, CrewAI, Semantic Search, AI Agents

Version Control: Git, GitHub

PROJECT EXPERIENCE

AgriSense Precision AI – AI-Powered Agricultural Advisory Platform

Tech Stack: Python, React.js, Lang Chain, VectorDB

- Engineered an AI-powered agricultural advisory platform using React.js.
- Designed a Retrieval-Augmented Generation (RAG) pipeline using LangChain for context-aware information retrieval.
- Integrated semantic search to improve the relevance of AI-generated recommendations.
- Developed REST APIs enabling seamless communication between the user interface and AI services.

CrewAI Quiz Platform – Multi-Agent AI System

Tech Stack: Python, CrewAI.

- Created a multi-agent AI application for automated quiz generation, evaluation, and feedback.
- Designed coordinated AI workflows for content generation, validation, and response processing.
- Implemented API services to support AI workflow execution and user interaction.
- Enhanced application modularity through task-specific AI agents.

React-Based Movie Search Application

Tech Stack: React.js, HTML5, CSS3.

- Built a responsive movie search application using React.js.
- Implemented real-time movie search with dynamic content rendering.
- Developed reusable React components using Hooks for efficient state management.
- Improved user experience through responsive design and personalized favorites functionality.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering
Bannari Amman Institute of Technology
2023 – Present
CGPA: 8.03/10

CERTIFICATIONS

- Google Crash Course on Python
- IBM Designing User Interfaces and Experiences (UI/UX)

LANGUAGES

English: Read, Write, Speak

Tamil: Read, Write, Speak

Hindi: Read, Write, Speak
